

SANTINEL

HIGH QUALITY DISINFECTION STATION

- Electronic fill level control
- Adjustable dosage
- Steel and aluminum construction

GLP SANTINEL

HIGH QUALITY DISINFECTION STATION FOR MOBILE OR STATIONARY USE

The GLP SANTINEL offers sophisticated design with simplistic operation. Whether in mobile use or in fixed installation, thanks to its 5 Liter / 1.32 gal capacity, the GLP SANTINEL is suitable for total safe hand disinfection, even in places with high visitor frequency. The non-contact dispenser technology has adjustable dosage settings and a convenient light for users in subdued environments.

Additional features include an electronic fill level monitor, and a lockable cannister compartment for security.

FAQ

HOW DOES THE SANTINEL WORK?

When you place your hands under the dispenser nozzle the sensor will release the preset amount of sanitizer fluid.

HOW FAST IS IT?

The sanitizer fluid is released in 1 – 3 seconds.

HOW MANY PORTIONS DOES IT HOLD?

The container holds 5 liter, enough for 1500 – 1700 portions.

WHICH FLUID CAN I USE?

You can use all common liquid disinfectants and the device is easy to refill.

DOES IT CONSUME A LOT OF ENERGY?

The energy consumption is very low, around 3 Watt and can be powered on and off according to the use. The dispenser starts up immediately after powering up.

DO I NEED SAFETY RECURSIONS OR EDUCATION TO USE THE DISPENSER?

All standard operations are very easy and described in the manual.

NO TOUCH OPERATION
